Dockerized Markdown-to-PDF Converter

- To convert a Markdown file, say `~/my_artwork/a.md`, into `~/my_artwork/a.pdf`, please run the following command:

  ```
  docker run --rm -v $HOME/my_artwork:/work cxwangyi/pandoc \
    mdtopdf.bash /work/a.md
  ```

- To convert all Markdown files in a directory, say `~/my_artwork`, and all its recursively sub-directoreis, into PDF files, please run the following command:
  ```
  docker run --rm -v $HOME/my_artwork:/work cxwangyi/pandoc \
    mdtopdf.bash /work
  ```

- To convert some files, say `~/my_artwork/a.md` and `~/my_artwork/b.md`, and some directories, say `~/my_artwork/docs`, just list them.

  ```
  docker run --rm -v $HOME/my_artwork:/work cxwangyi/pandoc \
    mdtopdf.bash /work/a.md /work/b.md /work/docs
  ```
